

K-love radio serves a large span of the Chicago land area. We only have one other Christian radio station in the area and the music they play is not as popular and is not as inspiring as K-Love. K-love is listener supported and has managed to continue broadcasting because obviously people want this station on the radio. If LPFM displaced KLOVE many people would be effected because all the work they put into supporting this radio station would be wasted. The only other major listener supported radio is NPR, which receives large donations from big companies. KLOVE however is supported by the culmination of many individuals who pay to hear this radio station. If the FM translators are forced off the air due to LPFM stations, the public would be losing an amazing radio station that is inspiring, uplifting and encouraging. Not only would my area of Chicago be effected by the removal of KLOVE, but the whole nation! Over 50 cities broadcast KLOVE and benefit from the positive message and commercial free music. Therefore, the impact of LPFM replacing FM translators is devastating. I move for FM translators to be kept on the air so that independant radio stations such as KLOVE can continue to broadcast and be heard nation wide by those who financially support to hear this radio station.
